Valeria Iezzi
Senior Digital Product Designer

I design complex platforms and data-driven tools, translating behavioural insights and business needs into intuitive product experiences. I work closely with product, engineering, and stakeholders to frame problems, test ideas, and simplify complex workflows across systems.

Devoteam Creative Tech — Senior Digital Product Designer
2022 - Present

Led end-to-end UX/UI design across complex enterprise platforms, internal tools, and data-driven products, with a strong focus on non-consumer-facing experiences. Collaborated with product, engineering, stakeholders, and users from discovery to delivery.

Selected work

IKEA — Digital Product Designer
2025 - 2026

Led end-to-end UX/UI design for a complex internal platform used by engineers, designers, and material specialists to explore, compare, and select materials.

- Planned and conducted qualitative and quantitative research to understand workflows, decision points, and user needs across roles.
- Used a service-design approach to map journeys, dependencies, systems, and touchpoints across complex internal workflows.
- Facilitated stakeholder workshops to frame problems, align priorities, and shape product direction.
- Improved how internal teams explored, compared, and selected materials, supporting more consistent and informed decision-making.
- Integrated sustainability and business data such as CO_2, cost, and availability into decision flows.
- Designed and tested prototypes to validate interactions, reduce friction, and align product direction.
- Collaborated closely with product, engineering, and stakeholders to shape scalable and realistic solutions.

Sandvik — Digital Product Designer
2023 - 2024

Led end-to-end UX/UI design for an internal enterprise platform used by sales engineers to support plant simulation, client communication, and commercial decision-making.

- Conducted user interviews and UX audits to identify workflow inefficiencies across engineering and sales contexts.
- Mapped and simplified complex processes across multiple systems, roles, and real-world use cases.
- Designed clearer navigation, information architecture, and UI patterns for technical workflows and enterprise decision-making.
- Improved usability in on-site and client-facing scenarios, making the tool easier to use during meetings and presentations.
- Supported offline accessibility, increasing reliability in environments with limited connectivity.
- Developed and tested prototypes to validate interaction models and align design direction.
- Strengthened sales enablement by helping teams present complex solutions more clearly and confidently.
- Collaborated with cross-functional teams to align design, business goals, and technical feasibility.

ASSA ABLOY — Digital Product Designer
2022 - 2023

Led end-to-end UX/UI design for ASSA ABLOY Aperio, a platform supporting installation workflows across buildings and access systems.

- Conducted user research with installers and administrators to understand real-world constraints, dependencies, and workflow pain points.
- Defined end-to-end journeys across web and mobile platforms.
- Structured complex configuration and installation flows into more intuitive user experiences.
- Designed and refined UI patterns to support faster, clearer task completion on-site.
- Improved usability for users working in real-world installation contexts, helping them complete tasks with greater confidence.
- Created and tested prototypes to validate flows, interactions, and task completion.
- Helped make the platform easier to adopt and more compelling as a sellable solution for external partners.
- Collaborated with product managers and developers to deliver aligned and feasible solutions.

Suitsupply — Digital Product Designer
2025

Led end-to-end UX/UI design for a mobile-first analytics product supporting business and sales decision-making across roles.

- Led UX and UI for a multi-layered dashboard used by managers and leadership to track and interpret KPIs.
- Conducted research and behavioural analysis to understand how users accessed, filtered, and acted on information.
- Defined user journeys from high-level overview to store and individual performance insights.
- Structured complex data flows into clear navigation, information architecture, and visual hierarchy.
- Designed and tested prototypes to validate usability and reduce friction in key decision flows.
- Collaborated with product and engineering to align user needs with business goals.

Lagkagehuset — Digital Product Designer
2025

Led end-to-end UX/UI design for a desktop analytics platform supporting stores and business teams in tracking sales, trends, and cost-related data across locations.

- Designed dashboards and flows helping users understand store performance and compare results across locations.
- Improved how teams accessed and interpreted sales, trend, and cost data for operational and business decisions.
- Structured complex retail data into clearer navigation, information architecture, and UI patterns.
- Supported store-facing and business-facing workflows through better visibility of performance insights.
- Worked on a data-driven product focused on clarity, usability, and faster understanding of key metrics.
- Collaborated with stakeholders and developers to shape feasible product improvements.

Arjo — Digital Product Designer
2025

Led end-to-end UX/UI design for a product experience around complex medical devices, helping marketing and sales teams present and communicate product value more clearly.

- Researched user needs around complex product exploration and understanding.
- Designed multi-layer navigation, interaction models, and UI patterns for structured product content.
- Improved how complex medical devices were presented, making features and value easier to understand.
- Supported marketing and sales teams with a clearer product experience for client-facing communication.
- Built prototypes to test and refine interaction patterns.
- Collaborated with stakeholders and developers to ensure feasibility and clarity.

Earlier Experience

Ripani — Digital & Product Designer
2019-2021

Designed digital product experiences and physical products for an Italian fashion brand.

- Led UX/UI design for B2C and B2B e-commerce platforms.
- Structured product navigation and information to improve discoverability and conversion.
- Used user insights and behavioural analysis to support data-informed decisions.
- Designed physical products as part of seasonal collections, from concept to development.
- Translated brand identity into cohesive digital and physical experiences.
- Contributed to customer journeys across multiple touchpoints.

Skills

UX research | UX/UI design | Service design | Workflow mapping | Systems thinking | Stakeholder workshops | Prototyping | Design Systems | Usability testing | Accessibility | UX writing | Information architecture | AI-assisted design | Figma | Miro | Dovetail | Google Analytics / Microsoft Clarity | Adobe XD/Ai/Id/Ps

Education

Interaction Design, MSc
Malmö University, Sweden
2019 - 2021

Exhibition & Graphic design, MSc
Polytechnic University of Milan, Italy
2015 - 2017

Set & Environmental Design, BA
Academy of Fine Arts of Urbino, Italy
2012 - 2015
